

DECEMBER 2022 INDEX OF INDUSTRIAL PRODUCTION (IIP)

This is the monthly Index of Industrial Production (IIP). Series has been developed by the National Institute of Statistics of Rwanda (NISR) to provide more timely estimates of the broad trends of industrial output. December 2022 Index of Industrial Production (IIP)

February 2023

NATIONAL INSTITUTE OF STATISTICS OF RWANDA

Monthly Index of Industrial Production- Formal Activity-December 2022

1. Summary

In December 2022, the Index of Industrial Production (IIP) shows that, industrial output (formal sector) increased by 6.4 percent compared to December 2021, against an increase of 10.9 percent on annual average basis.

Activities performed as follows:

- > Mining and quarrying increased by 160.4 percent
- > Manufacturing decreased by 1.6 percent
- > Electricity increased by 7.6 percent; and
- > Water and waste management increased by 0.5 percent

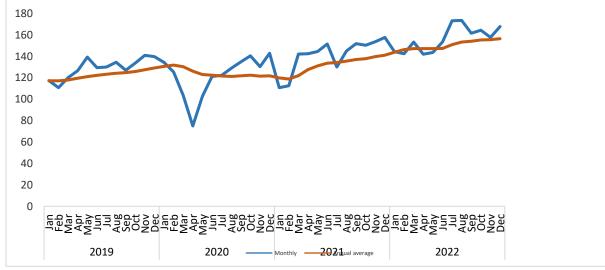

Chart 1: Index of Industrial Production (formal activity) constant 2017 prices

Source: NISR/Index of Industrial Production

2. Details

Activities that have contributed positively to the overall index are mining and quarrying, and electricity. However, the positive change of the overall index is tempered by the negative changes of manufacturing.

The manufacturing activity has registered negative change in its overall index. The negative change in manufacturing activity is mainly due to 14.5 percent decrease in food processing and 21.4 percent decrease in manufacturing of chemicals, rubber and plastic products.

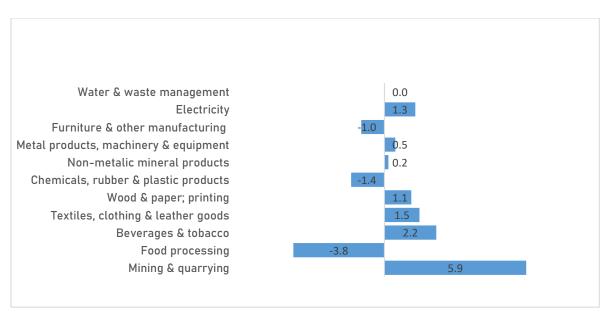

Chart 2: Contribution to percentage change (Dec 2022 compared to Dec 2021)

Source: NISR/Index of Industrial Production

Note:

-The series from 2017 are based on the new weights.

-For the years before 2017, the growth rates of old series are preserved by dividing the old series by the above linking

factors.

Notes

The Index of Industrial Production (IIP) is a statistical instrument used to monitor the monthly trends in output of industrial activities. It is developed based on a range of short term (monthly) indicators of economic activity.

The IIP series were developed since 2017 and the first publication was done in June 2019. In this publication a series from January 2011 have been compiled and availed to the public. Moreover, figures in this publication are the results of the 2017 rebasing exercise explained below in this note.

The IIP in this statistical release relates to the activity of businesses in the formal sector in Rwanda, defined as those registered with the tax authorities. The IIP series is entirely consistent with the quarterly estimates of Gross Value Added published by NISR, which still provide the most comprehensive and detailed assessment of economic activity.

The scope of the IIP as recommended by the United Nations Statistical Office (UNSO) includes mining and quarrying, manufacturing, construction, electricity, gas and water production and supply. But due to constraints of data availability, the IIP compiled in Rwanda has excluded construction activities.

2017 Rebasing

The National Institute of Statistics of Rwanda finalised new series that are based on the 2017 weights replacing old series based on 2014 weights. The International best practice recommends doing it at least once in five years but in Rwanda it is compiled every three years due to the availability of information collected at a higher frequency. Note that the series from 2017 are based on the 2017 weights. For the years before 2017, the growth rates of old series are preserved by dividing the published indices by the linking factors found in the above table 4.

The IIP is produced based on monthly indicators of the volume of economic activity for eleven Rwanda Classification of Products by Activity (RCPA). These are weighted together based on the gross value added in the reference year for the series (currently, 2017), consistent with the estimates of published value added within the Gross Domestic Product series, see table 5.

The correspondence table between RCPA and ISIC (International Standard Industrial Classification) Revision 4 is shown in Table 6.

Table 5:	2017	Gross	Value	Added
----------	------	-------	-------	-------

		Gross Value	Percentage
		Added (RWF,	of total
RCPA	Activity	billions)	GVA
В	Mining & quarrying	57.4	13.0%
СА	Manufacturing of food processing	105.8	23.9%
СВ	Manufacturing of beverages & tobacco	75.3	17.0%
CC	Manufacturing of textiles, clothing & leather goods	19.9	4.5%
CD	Manufacturing of wood & paper; printing	11.5	2.6%
CE	Manufacturing of chemicals, rubber & plastic products	25.0	5.7%
CF	Manufacturing of non-metallic mineral products	22.4	5.1%
	Manufacturing of metal products, machinery &	20.0	4.5%
CG	equipment		
СН	Furniture & other manufacturing	15.0	3.4%
D	Electricity	83.6	18.9%
Е	Water & waste management	6.2	1.4%
	Total	442.1	100.0%

Table 6: Matching table between Rwanda Products Classification by Activity (RCPA) and International Standard Industrial Classification Revision 4 (ISIC Rev 4)

	(Rwanda	Classification of Products by Activity)	ISIC Rev.4 (here R stands for Rwanda)					
Code	Level	Description	Code	Code1	Description
