12	Miscellaneous goods and services	4%	0.2%	2.8%

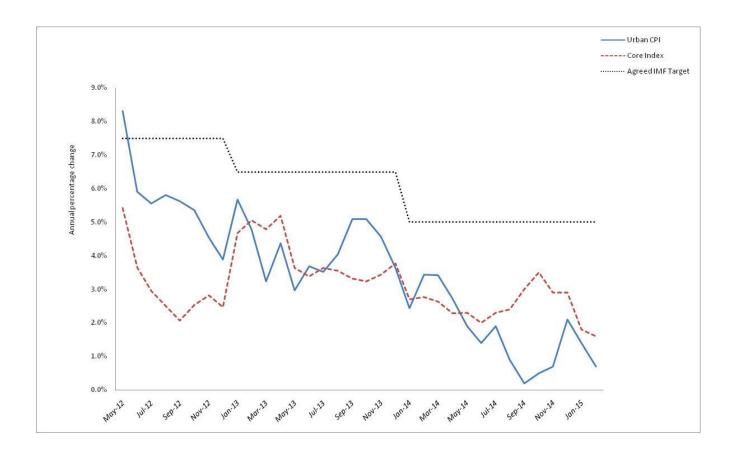

The Urban CPI increased by 0.7 percent in February 2015 compared to the same month of the previous year. This is mainly due to the rising prices of 'Housing water, electricity, gas and other fuels' 3.6 percent. The biggest negative contribution came from 'Transport' (0.8 percentage points).

The monthly change in CPI is 0.5 percent compared to January 2015. 'Food and non-alcoholic beverages' and 'Housing water, electricity, gas and other fuels' increased by 1.1 percent and 0.4 percent respectively.

The underlying inflation rate (excluding fresh food and energy) increased by 0.1 percent when compared to January 2015 and increased by 1.6 percent when compared to February 2014. The annual average underlying inflation rate is 2.5 percent.

4. Methodological notice

The Consumer Price Index (CPI) is a measure of the average change over time of goods and services purchased by households. The CPI uses a Modified Laspeyres formula to calculate the index. The reference population for the CPI consists of all households, urban and rural in Rwanda.

The household basket includes 1,022 products sold in many places spread all over the country. A variety of places of observation are selected: shops, markets, hospitals, schools etc. More than 25,392 prices in urban areas and 8,329 in rural areas are collected every month.

The weights used for the index are from the result of the Household Living Conditions Survey (EICV III) conducted in 2010-2011 with a sample of 14,308 households.

4.1. How to Interpret the CPI

Movements of the indices from one month to another usually are expressed as percentage changes rather than changes in index points. The level of the index (relative to its base period) affects index point changes, but it does not affect percent changes.

The following example illustrates how to calculate percentage changes:

CPI	178
Less CPI for previous period	<u>176</u>
Equals index point change	2
Percent change	
Index point difference	2
Divided by the previous index	i 176
Equals	0.011
Results multiplied by 100	0.011 x 100
Equals percent change	1.1
