National Institute of Statistics of Rwanda (NISR), National Gender Statistics report, 2016; September 2016

Foreword

Achieving development for all requires formulation of policies that recognize the role of gender equality. Therefore, production and dissemination of timely and reliable sex-disaggregated/gender relevant data is extremely important to facilitate evidence based policies and decisions making that take into account women and men in the community.

It is from the above background that the National Institute of Statistics of Rwanda (NISR) in collaboration with the Ministry of Gender and Family Promotion (MIGEPROF) and the Gender Monitoring Office (GMO) with the support of UN Women through ONE UN embarked on establishing and strengthening a comprehensive Gender Statistics Framework (GSF) resulting in the report entitled National Gender Statistics Report that reflects the status of gender equality in key development sectors. The aim of the framework is not only to encourage policy debates in particular around gender gaps but also provide quantitative evidences for planning, monitoring and evaluation of programs.

This third edition of the National Gender Statistics Report provides the updated sex-disaggregated data in twelve fields: Population & Youth; Education; Health & Nutrition; Economic Activity & time use; Poverty & Social Protection; Justice & Human rights; Environment & Natural Resources; Decision-making & Public life; Infrastructure, ICT & Media; Trade & Business & Industry; Agriculture, Livestock & Forestry, and lastly the Income & Access to Finance. It should be noted that this report takes into account almost all quantitative indicators of the United Nations Minimum Set of Gender Indicators (UNMSGI) as developed by the United Nations Statistical Division (UNSD) and some of the approved quantitative SDGs gender related indicators.

In general, the third edition of this report shows that there are gaps between men and women and provides a viable benchmark on the gender status in different development sectors. We are confident that it will be a timely data bank of useful development information on Rwanda.

The National Institute of Statistics of Rwanda looks forward to continuing good collaboration with UN Women and all other interested partners to avail sex disaggregated data and expects more users' needs to be considered in future editions.

Yusuf Murangwa
Director General, NISR

Acknowledgement

This report has been prepared with participation of a number of individuals and organizations. We would like to express our gratitude to all of them and sincere appreciation to our partner on gender statistics, UN Women, for the great support and inputs throughout the process of compiling and publishing this report.

We thank the technical staff from National Institute of Statistics of Rwanda (NISR) for their unfailing participation in all activities of compiling this report, especially Mr. Venuste NKURUNZIZA Statistician in-charge of Socio Cross-cutting Statistics: Gender and Youth and Mr. MUCHOCHORI KANOBANA Dominique, the Technical Advisor for Gender Statistics (from UN Women) under the guidance of Mr. Michel NDAKIZE, Director of the Demographic and Social Statistics Unit (DSS). We also appreciate the valuable technical support in the design of this report by Mr. NYIRIMANZI Jean Claude, Statistician Team Leader in charge of Research, Publications and Documentation. To all the above, we say thank you.
