

The consumer price index (CPI), the producer price index (PPI) and the Index of Industrial Production (IIP) are economic indicators, and although CPI and PPI quantify price fluctuations for goods and services, they differ in the composition of their target sets of goods and services. IIP measures the real production output of mining and quarrying, manufacturing and utilities.

Consumer Price Index (CPI)

Rwanda's Consumer Price Index (CPI), main gauge of inflation increased by 7 percent year on year in June 2025 up from 6.9 percent in May 2025.

Producer Price Index (PPI)

Rwanda's general Producer Price Index combining both prices for local and export products registered an annual increase of 6.3 percent in May 2025.
